Atlas of MS – 3rd edition

Clinical Management – Stakeholder Engagement - Breakout group allocation V1 26 November 2020

Background

The Clinical Management results is a rich dataset which will help inform our work. Results will be available as:

- A full written report which will highlight the global findings/messages and recommendations
- Website – key data displayed via maps/charts/factsheets and the full dataset will be downloadable
- Toolkit comprising example messages/social media posts that can be used at a national/regional level - countries will be able to tailor these to focus on the priorities in their country.
- Webinars with MS organisations at launch to highlight how to use the data

As key stakeholders (IWGA, IMSB, Atlas working group and expert advisors) you have been invited to help us shape the messaging and recommendations:

Meeting sessions and breakout groups

You have been allocated to a specific breakout group to enable us to get a good spread of countries/different types of stakeholders to review each type of messaging (see table below – ranked in alpha order of first name). If you have a strong reason to move groups please get in touch and I will try to accommodate your wishes. I'd be delighted to receive any additional feedback via email (either before the meeting or on the day).

Country	Contact	Session Attending	Break out session allocation:
Russia	Alexey Boyko		
Uruguay	Andrea Prato	Session 1: 9am	Room 2: DMT key messages and recommendations (charts 26-28)
