

LACTRIMS

LATIN AMERICAN COMMITTEE FOR TREATMENT
AND RESEARCH IN MULTIPLE SCLEROSIS

Asunción, September 17, 2019

Dear Bernard

I want to thank you for your favorable predisposition at the TRIMS meeting.

I officially sent you this note remembering the collaboration requests made.

1-The realization of an ECTRIMS Symposium at the XI LACTRIMS 2020 congress from November 5 to 7 at the Agora convention center in Bogotá Colombia, the same would have 4 speakers, whose agenda and speakers we could agree on by mutual agreement, we would become charge of expenses. I will need compliance for the start of coordination.

2-We would like to request that ECTRIMS allow us a place for a Fellows of Junior Neurologist researcher in Latin America, I know that others have already been awarded to European Societies, who have many funds for it, we instead do not, so it would be strategically extraordinary to collaborate with LACTRIMS giving us even one every year or two years.

3-I know that there are many commitments with other TRIMS as well as European organizations of weight, but we would like to participate with the invitation of Latin American speakers in subsequent ECTRIMS, I think we could contribute fundamental issues in the field of Genetics, Environment, Epidemiology, NMOSD etc., considering that Latin America has a great advantage by having a diversity and mixture of races.

LACTRIMS intends to re-establish cooperative ties as in the past with ECTRIMS, we are willing to put what is necessary to demonstrate that this would be beneficial for both.

I take the opportunity to express my respects.

Fernando
